

SD 2200v2

Brilliant, high performance gold detector with 5 outstanding features.

Minelab's SD 2200v2 combines automatic ground balance, discrimination and automatic tuning - making it one of the world's most sophisticated and powerful gold detectors. The Boost Amplifier and Tone control allow you to customise your detector, making hard to hear sounds, clear and defined. The discrimination function rejects strong signals from ferrous junk, allowing more time detecting and less time digging unwanted targets.

FEATURES		
Length	Maximum	1370mm
	Minimum	1100mm
Weight	Complete (excluding battery)	2.4kg
Configuration		Shaftmount
Technology		Multi Period Sensing (MPS)
Ground Rejection		Automatic Ground Balance
Discrimination		Disc or Disc+ID
Battery		6V 12 Ah Gel Cell (10-12 hours)
Coil		11" Double D
Metal Arm Rest, Neoprene Cover & Strap		
Controls		
On/Off		2 pos. switch
Threshold		1 turn control
Tone		1 turn control
Tune		1 push button
Channel		3 pos. switch (CH1, CH2 & Both)
Search		2 pos. switch (Fixed & Tracking)
Iron Discriminate		3 pos. switch (Disc, All metal & Disc+ID)
Audio		3 pos. switch (Shallow, Normal & Deep)
Headphones		
1/4" Headphone Jack		Stereo/Mono
Accessories		
Coils		8", 11" & 18" Monoloop
Car Charger		12V, Cigarette lighter plug
Mains Charger		240V
Warranty		
Control Box		2 years
Coil		1 year
